

HOW TO CHOOSE A BED SHEETS SIZE + CASE!??

To choose a proper size of a sheet you need to measure your mattress.

Step 1. Measure the mattress length.

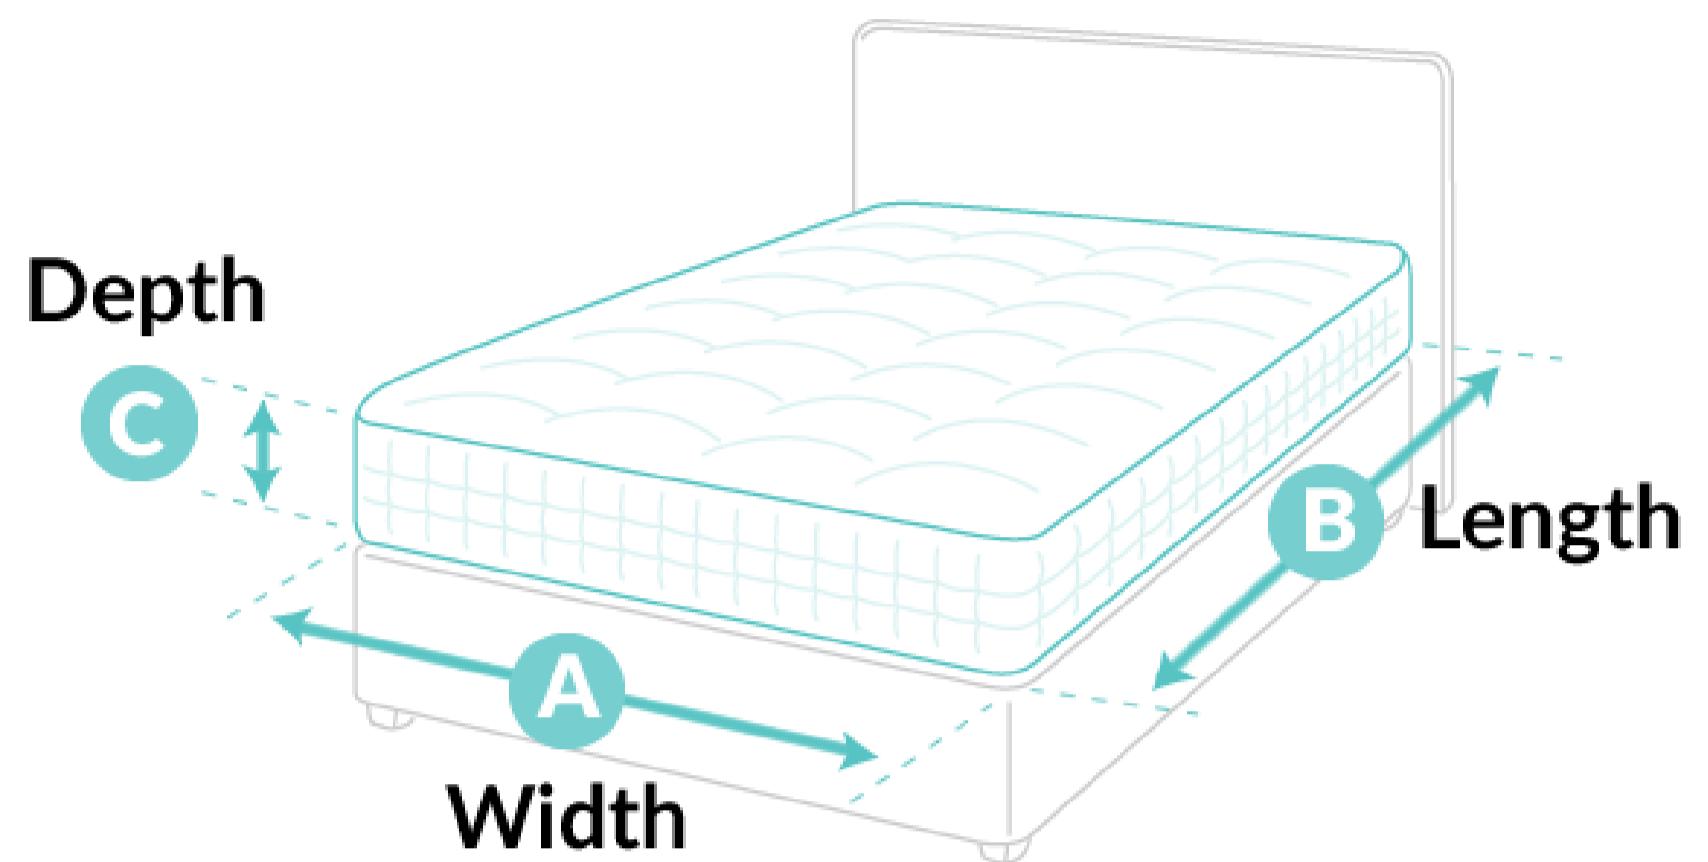

Measure from the top (head) of the mattress while keeping a straight, flat line and pulling the tape measure to the bottom of the mattress.

Step 2. Measure the mattress width.

Measure across the widest part of the bed from left to right, again creating a line that is straight and flat over the mattress.

Step 3. Measure the mattress depth.

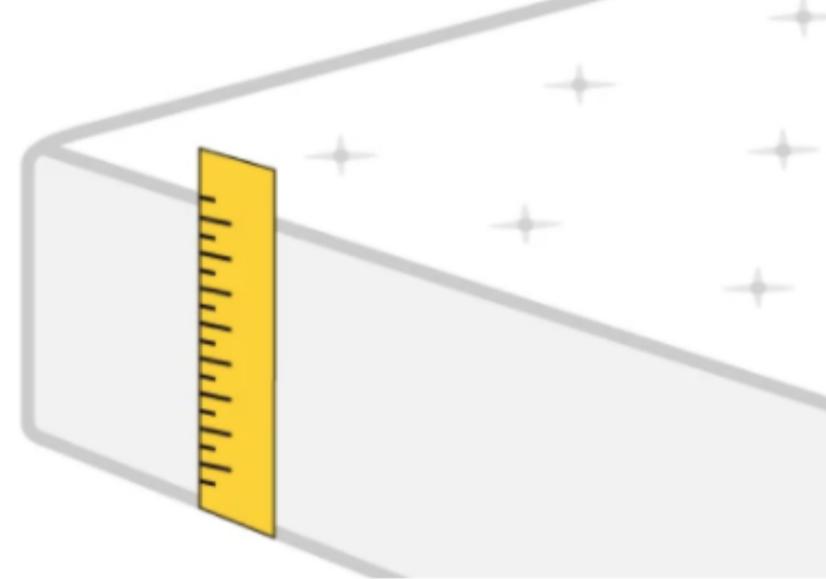

Measure from the top of your box spring up to any mattress toppers or padding. Round up to the nearest inch.

Measuring Tips:

- Do not press on the top of the mattress while measuring, this can reduce the height measurement.
- Use a firm (ie, a carpenter's) tape measure, rather than a flexible (ie, a tailor's) measuring tape for the most accurate results.
